ADVANCED YOUR CAREER WITH NATIONAL CERTIFICATE: SOFTWARE DEVELOPMENT NQF LEVEL 5, CREDIT 247

The National Certificate in Software Development is on NQF Level 5. It has 131 credits and has been designed for people who are interested in entering the Software Development field. This course syllabus has been developed by IRG and Training provided by INFOMAGE based on SAQA Registered Unit Standards. IRG recognizes the growing importance of Software Development as a skill-set that more and more people need in order to contribute effectively to the dynamic business environment. The course enables candidates to demonstrate that they can effectively manage all elements of a project, information, technology and development – towards a project goal. Candidates will be required to prove competence in a wide set of development related skills including database implementation, management and design. The ability to manage and direct projects of varying sizes and complexities is an important skill that Developers need at all levels. The National Certificate in Software Development provides a framework for developing these skills in a variety of ways and has been developed specifically for the National market.

RPL PROCESS FOR EXPERIENCE PROJECT MANAGER

The RPL Programme for the National Certificate in Software Development at NQF level 5 is six to 12 month programme aimed at experienced Project Managers who wish to obtain recognition of their skills and a national qualification. The qualification is a performance or competence based qualification that is registered with SAQA. This RPL Programme aims to guide you through the processes that lead to assessment and to then assess you against the qualification or some of its component standards. This is not a training course but it may include components of training to close gaps and it is an assessment support programme.

THE PROGRAMME COMPRISES:

- Instructor-led workshops which are used to explain the qualification and assessment requirements, to provide feedback on evidence gathered and to prepare the knowledge evidence
- Evidence gathering and development tasks in your own time
- Summative assessment for the qualification
